The Language of Deception Synopsis

Everybody lies. Studies have shown that the average person lies several times a day; be it the white lie told to prevent hurt feelings, to the more serious lies that devastate friends, family, and society. Deception is something we live with every day and these days it's more important than ever to learn the fundamentals of deception detection. In this presentation, participants will learn to identify verbal and nonverbal signals that indicate issues or deception and increase their chances of getting to the truth. Isn't it time to learn the truth about lying?
